

HIMSS (Healthcare Information and Management Systems Society)

Vision

To realize the full health potential of every human, everywhere.

Mission

Reform the global health ecosystem through the power of information and technology.

HIMSS is a global health advocate and thought leader.

A mission-driven nonprofit, HIMSS offers a unique depth and breadth of expertise in health innovation, public policy, workforce development, research and analytics to advise leaders, stakeholders and influencers across the global health ecosystem. With a community-centric approach, our innovation engine delivers key insights, education and engaging events to healthcare providers, payers, governments, startups, life sciences and other health services organizations, ensuring they have the right information at the point of decision.

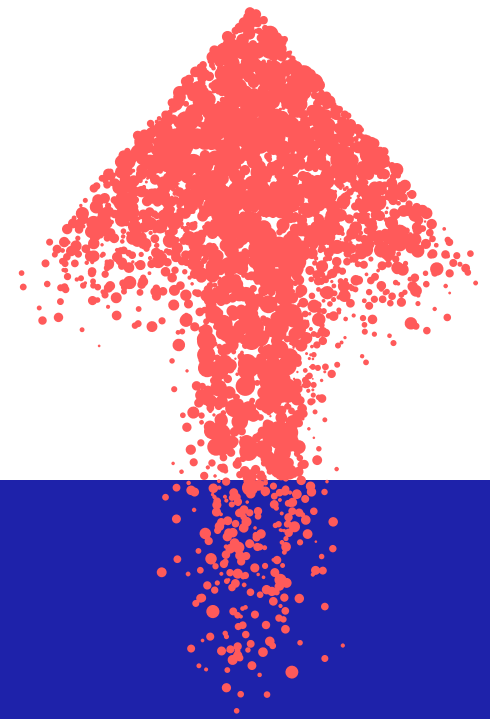

HIMSS serves the global health information and technology communities with focused operations in North America, Europe, United Kingdom, the Middle East and Asia Pacific. HIMSS members include more than 125,000 individuals, 430+ provider organizations, 500+ nonprofit partners and 550+ health services organizations. The HIMSS Global Headquarters is in Rotterdam, the Netherlands, and the HIMSS Americas Headquarters in Chicago, Illinois.

Convening, Networking and Solving

HIMSS and its members think globally and act locally to identify common healthcare delivery challenges and opportunities. Together, we find practical solutions for policy, people and technology issues.

Our thought leaders along with individual and provider members reach millions of people worldwide. We develop and share scalable solutions so health ecosystems worldwide can offer safe, equitable and efficient care.

We host flagship events in North America, Europe, Asia Pacific and the Middle East, along with summits and forums to address issues-driven topics such as workforce development, artificial intelligence, cybersecurity and digital health transformation.

Digital Health Transformation

Since 2005, HIMSS has researched, built and evolved evidence-based models and frameworks to enable and advance digital health transformation.

Our research measures the benefits and returns on investment for digital healthcare, and our programs have been adopted by health systems and governments around the world, improving care delivery outcomes.

The **HIMSS Digital Health Indicator** is a measurable framework and advisory services for transformation in healthcare. **HIMSS Maturity Models** help organizations get the most out of their technology and services investments. **Digital Health Technology Partners** help organizations progress through the maturity models with a variety of consultancy and on-site assessment and advisory services.

HIMSS Members and Communities

HIMSS members are information and technology changemakers passionate about transforming health locally and worldwide.

Members make up a growing number of HIMSS communities where people connect, learn and lead initiatives with like-minded colleagues around the world. HIMSS communities host conduct peer-to-peer networking and frequent opportunities for problem solving and idea exchange. Communities are the key vehicle to localizing our mission and vision.
